ELWIS
DANISH QUALITY
SINCE 1953

HIGH-END LIGHTING TECHNOLOGY

WHY ELWIS?

- In 1953 Elwis invented and produced the first low voltage hand lamp in the world.
- Elwis is a 3rd generation family owned company.
- Elwis is headquartered in Denmark.
- We have 65 years of design and manufacturing experience to help develop and produce products for leading professional wholesalers and distributors all over the world.
- We produce both in Elwis brand as well as in private label.
- Elwis offers a complete range of portable lighting to meet the needs of professional mechanics, electricians and other industrial craftsmen.
- The Elwis PRO series is developed by an experienced team in cooperation with professional end users from different industries – resulting in perfect work tools.

DESIGN AND PRODUCTION

Elwis lamps are designed by an experienced team of engineers and designers. Private label products are typically designed by our customers; we then manage the processes of engineering, testing, tooling and approvals according to the regulations of each market.

Nowadays, most of our production takes place in China where we have two exclusive factory partnerships. We only use the best quality LEDs from leading USA and Japanese brands. Other parts like batteries and adaptors are also from trusted manufactures with whom we have a long-term relationship.

QUALITY CONTROL

To secure high quality in all aspects of our business we employ an external engineering partner in Denmark who has extensive expertise in testing electronic devices. No new design is released for final production before it has been approved by both our own engineers and external partner.

When a lamp is finally released for production and sales, continuous tests are made of the lamps before distribution. This is our way of ensuring that the quality is not compromised and that we always deliver lamps of the highest quality and durability.

OUR GOAL

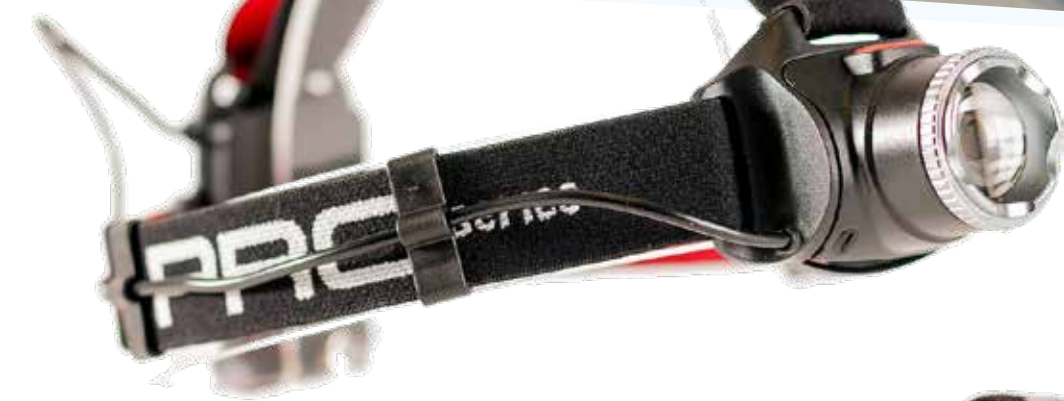

We aim to produce durable lamps for professional end users, with the best technology for each specific product type. By keeping ourselves constantly updated with market demands, we strive to always be able to supply products that will exceed your expectations.

We focus on cooperation with reliable and long-term partners who can represent the Elwis brand in their national market.
